Slot: B

Course Name: DATA HANDLING AND VISUALIZATION

Course Faculty: Dr. Senthilvadivu S

Project Title: Design of a Child Nutrition and Food Security Mapping Visualization Platform

Module Photographs:

Architecture Diagram

Module3: Severity Classification & Structural Health Monitoring

Presentation Image

Project Description:

Project Description: Design of a Child Nutrition and Food Security Mapping Visualization Platform focuses on mapping and visualizing child nutrition and food security data to identify vulnerable regions and support better decision-making.

Module 3: Severity Classification & Monitoring analyzes indicators such as **malnutrition, stunting, wasting, food availability, and accessibility** to classify regions into **Low, Medium, High, and Critical** severity levels. The module provides interactive maps, dashboards, trends, and alerts to identify high-risk areas and support timely intervention and resource planning.
