

Question 1 – Bar Chart

Product Categories and Sales

```
category <- c("Groceries", "Dairy", "Fruits", "Vegetables",  
             "Bakery", "Beverages", "Snacks",  
             "Personal Care", "Household Items", "Frozen Foods")
```

```
sales <- c(120, 95, 80, 75, 68, 90, 110, 55, 70, 60)
```

Bar Chart

```
barplot(sales,  
        names.arg = category,  
        col = "skyblue",  
        main = "Sales Revenue by Product Category (June 2026)",  
        xlab = "Product Category",  
        ylab = "Sales (₹ Lakhs)",  
        las = 2)
```

Highest and Lowest

```
highest <- category[which.max(sales)]
```

```
lowest <- category[which.min(sales)]
```

```
cat("Highest Selling Category:", highest, "\n")
```

```
cat("Lowest Selling Category:", lowest, "\n")
```

Question 2 – Histogram

Salary Packages (LPA)

```
salary <- c(3.2, 4.5, 5.0, 6.8, 7.2, 8.5,
            4.8, 5.5, 6.0, 7.8, 9.2, 10.5)
```

Histogram

```
hist(salary,
     breaks = 5,
     col = "lightgreen",
     main = "Distribution of Salary Packages",
     xlab = "Salary Package (LPA)",
     ylab = "Frequency",
     border = "black")
```

Summary

```
summary(salary)
```

Question 3 – Pie Chart

Marketing Budget

```
channel <- c("Social Media", "Television", "Print Media",
             "Radio", "Email Marketing",
             "Influencer Marketing", "SEO", "Events")
```

```
budget <- c(28, 22, 10, 8, 12, 9, 6, 5)
```

Pie Chart

```
pie(budget,
    labels = paste(channel, budget, "%"),
    col = rainbow(length(budget)),
    main = "Marketing Budget Allocation")
```

Question 4 – Scatter Plot

Advertising Cost and Sales Revenue

```
advertising <- c(5, 8, 10, 12, 15, 18, 20, 22, 25, 28)
```

```
sales <- c(42, 55, 63, 70, 82, 91, 98, 110, 120, 132)
```

Scatter Plot

```
plot(advertising, sales,
```

```
     main = "Advertising Cost vs Sales Revenue",
```

```
     xlab = "Advertising Cost (₹ Lakhs)",
```

```
     ylab = "Sales Revenue (₹ Lakhs)",
```

```
     pch = 19,
```

```
     col = "blue")
```

Regression Line

```
abline(lm(sales ~ advertising), col = "red", lwd = 2)
```

Correlation

cor(advertising, sales)

Question 5 – Line Chart

Months

```
month <- c("Jan","Feb","Mar","Apr","May","Jun",
           "Jul","Aug","Sep","Oct","Nov","Dec")
```

```
energy <- c(420,450,490,530,560,600,
            580,590,610,630,590,540)
```

Line Chart

```
plot(energy,
```

```
type = "o",
```

```
col = "darkgreen",
```

```
xaxt = "n",
```

```
xlab = "Month",
```

```
ylab = "Energy Generated (MWh)",
```

```
main = "Monthly Solar Energy Generation (2025)")
```

```
axis(1, at = 1:12, labels = month)
```

```
# Highest and Lowest
```

```
highest <- month[which.max(energy)]
```

```
lowest <- month[which.min(energy)]
```

```
cat("Highest Energy Generation:", highest, "\n")
```

```
cat("Lowest Energy Generation:", lowest, "\n")
```
